

Lytec[®] 2006

Eligibility Verification

Accelerate Your Cash Flow, Reduce Costs and Improve Office Productivity!

Lytec 2006 features full integration with our Electronic Eligibility Verification service! Using this service within Lytec 2006, medical practices can easily check patient eligibility automatically prior to scheduled appointments or point and click for real-time verification for a single, walk-in patient!

Eligibility Verification provides quick confirmation of patient insurance and benefit coverage, reducing the likelihood of bad debt. With the click of a button, a full day's list of scheduled patients can be sent to most payers with responses retrieved directly from the payers to deliver you accurate, up-to-date eligibility information. This service not only saves time by eliminating lengthy phone calls to payers. It also accelerates cash flow by enabling immediate patient collection payment for any treatment not covered by insurance.

Real-time eligibility verification and benefit inquiry transactions can be achieved either real-time or batch via the Internet enabling users to:

- query payer systems
- verify a patient's eligibility
- check a patient's benefits

Responses to the eligibility verification and benefits inquiry include:

- validation of the request
- patient demographics
- member and subscriber ID
- coverage status
- co-payment
- medical group and primary care physician data

Enhance Your Practice's Revenue Cycle with these Lytec Transaction EDI Solutions

- Electronic Eligibility Verification
- Electronic Claims and Remittance Processing
- Electronic Patient Statements
- Electronic Remittance Advice (ERA)

Lytec provides you with all the tools you need to simplify complex financial and billing tasks.

All of this and more at an affordable price.
